Our New 40th Street Branch

Above is reproduced a photograph of our newest Branch. It is located in the heart of West Philadelphia, on Lancaster Avenue at 4007, with the rear of the Building extending to another main thoroughfare—40th Street.

Plumbers in this section will find this new Branch a decided convenience, as the stocks will be large and complete in every detail.

When in the vicinity, you are cordially invited to visit us. Victor Seixas, who has long been with the Company, calling on the trade, will be on hand to greet you. He will be assisted by Albert Coutant, who is also well known to the trade.

Thrush System of Hot Water Heating

Class Double AA Equipment

Safe! Dependable! Automatic!

There is no substitute for safety! Thrush System has proved throughout the year that it is one Pressure System which is absolutely safe and trouble free. Every Thrush System you install helps you to gain a reputation as the best heating contractor in your community. Class Double AA Equipment is absolutely automatic—automatic filling as well as automatic pressure relief and temperature regulation.

A Thrush Equipped and Regulated Hot Water Heating Plant is the ideal way to heat homes, apartments, and all buildings where mild, dependable, uniform heating is desired. Thrush Hot Water Heating is flexible and easily accommodates the weather changes.

CLASS DOUBLE AA EQUIPMENT

Thrush Class Double AA System consists of the Thrush Differential Pressure Relief Valve, Automatic Temperature Damper Regulator, Pressure Reducing Valve, Copper Bearing Steel Pressure Tank and Special Gauge and Thermometer.

THRUSH AA SYSTEM

	Price
Size No. 0 Up to 350 sq. ft. of Radiation	\$78.00

Silver King Boiler Solder

For Use in All Steam and Hot Water Boilers

Silver King Boiler Solder is a powdered metal solder, scientifically compounded to form a permanent patch at the break which resists pressure and expands and contracts with heat.

Is especially recommended for use in all new installations, insuring against leaks in sand holes and threads of pipe.

Will not deteriorate nor lose its efficiency. Will do its work perfectly and will save the cost many times over, in doing away with return trips.

Quart can	\$7.20
Carton (6-quart cans)	6.48

Unconditionally Guaranteed

Keystone
Water
Meters

Type "W"

Keystone Water Meters are of the disc type with outer cases of bronze in the $\frac{5}{8}$ " to 2" sizes. All working parts of the meter, including the case and bronze parts of the intermediate train, are heavily coated with tin by special hot dipping process. This tinning is done after the parts are machined—no raw surfaces are exposed to the action of the water.

The Keystone Compound Meter consists of a combination of two units, automatically controlled for measuring accurately large and small flows of water without decreasing pressure to any extent.

The Pittsburgh Equitable Meter Company also manufactures the EMCO Water Heater and Gas Appliance Regulator for use on Water Heaters and Domestic Furnaces.

Price $\frac{5}{8}$ " size \$16.00

WHITAKER
GALVANIZED
RANGE BOILER

The sum total of careful manufacture. Add up all the factors in the making of this better boiler.

Heavy steel sheets, accurately formed; greater number of rivets, uniform unskimped coating of pure zinc inside and out.

All under one critical supervision, from the manufacture of the raw material to the complete product.

Then you have in the result a Whitaker Range Boiler—the right kind to buy.

No other Oil Burner in
the world has all of
these features

No MATTER what price you
may pay, your oil burner dollar cannot
buy more than you get in a Rightway.

For here is a burner tested and
proven by the Engineering Depart-
ments of the University of Detroit,
University of Michigan and the Massa-
chusetts Institute of Technology.

Variable flame principle gives high-
est operating efficiency and economy.
Elimination of over 1000 parts and use
of patented hydraulic super-sensitive,
adjustment-proof controls, results in
great simplicity and freedom from
service. Your heating plant is not
altered in any way for its installation,
thus you can still use your boiler for
rubbish disposal. Rightway is a full
capacity, completely automatic, quality-
built burner, at a phenomenal price.
Phone for folder giving the complete
Rightway story.

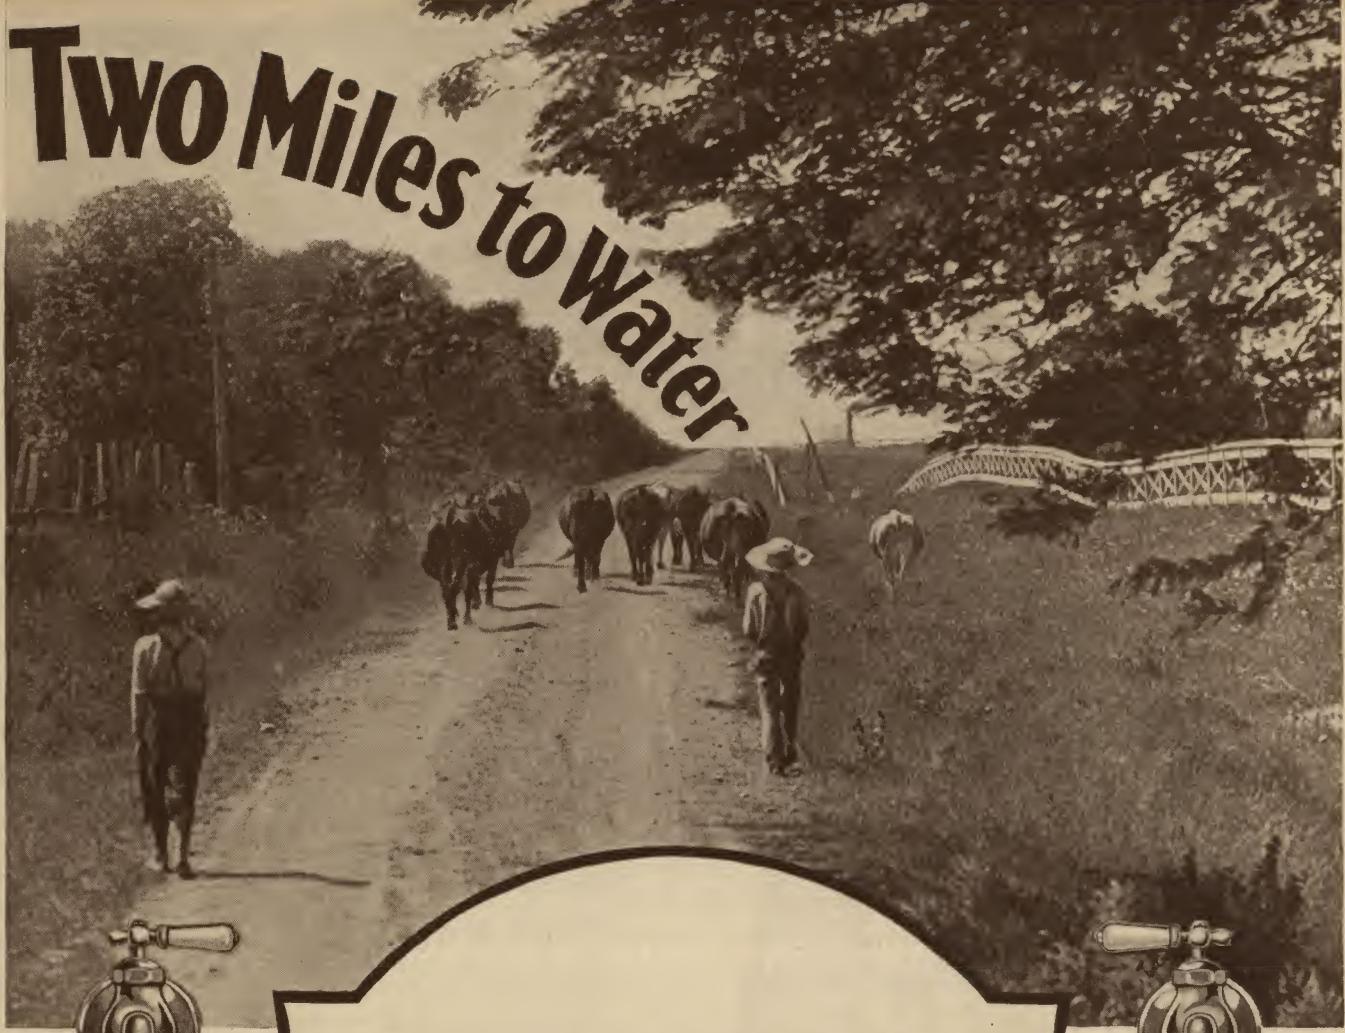

Grates are left intact in the heat-
ing plant so rubbish can still
be burned in your furnace.

"Listed as Standard
by Underwriters'
Laboratories"

A low-priced oil burner—easy to
sell—simple to install. Any home
owner or even renter is a prospect.
Write for further information and
let us give you our special dealers
proposition.

Two Miles to Water

Two miles down the road to a distant stream—a beautiful pastoral picture but a long ways to go for water.

Don't miss the importance of the story this picture tells. Don't underestimate the possibilities it uncovers for pump and water system business.

The thousands who suffered through water shortage during the recent drought are the thousands who are now thinking in terms of improved and larger capacity pumping equipment.

A short story but directly to the point. It reveals remarkable opportunities for every Myers dealer to increase his pump and water system business during the months to come.

Fig. 128E3

"Hays 90" Double-Seal

The Hays Copper Plumbing Method provides a plumbing installation at a cost less than that of brass and but little more than wrought iron or steel pipe.

The Hays Double Seal Connection employs a new and exclusive feature. Instead of one point of contact in the joint there are two. These are a 45-degree and a 90-degree angle seat. The 45-degree seat holds the pipe in a wedge, making an absolutely tight seal. The 90-degree seat is the shock absorber. It locks the pipe, provides a second seal of positive tightness, and protects the 45-degree seal by absorbing all pulling strain and vibration.

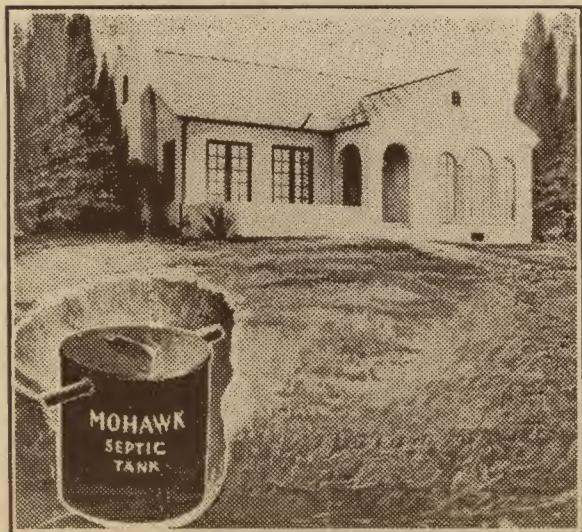

Note in the illustration above how snugly the "roll" in the flange fits against the 45-degree angle seat, as well as the 90-degree angle seat, of the connection. Only Hays has this double seal construction feature; so no other connection can be as strong, as tight, or as permanent.

WE CARRY A COMPLETE STOCK OF THESE FITTINGS AS WELL AS COPPER SERVICE TUBING

Mohawk Septic Tanks

A Modern Sewage Disposal

EASY TO INSTALL

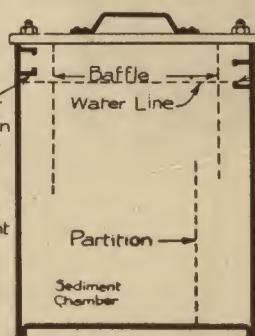

NET CAPACITY AND RATING

Cover Handle - Makes Installation easier.

Note:

The Improved BUILT-IN pipe connection which insures proper installation and prevents breakage from settlement of tank or in shipping.

The inner flange prevents pipe from sliding in too far making it easy for nonskilled labor to connect same, eliminating all danger of a poor connection.

Enlarged Cross Section of BUILT-IN Pipe Flange Connection.

Built-in Pipe Connection eliminates bent and broken pipe collars, in handling, shipping or tank settlement.

Inner Flange prevents pipe from sliding in too far, eliminating all future dangers of pipe stoppage.

Cover Handle saves time in adjusting tank for installation.

Increase your earnings—make the plumbing job complete, by installing the Mohawk Septic Tank in suburban homes, school houses, farm houses, amusement parks, factories, gas stations, and comfort stations.

You will find many home owners in unsewered districts who are ready to pay for the comfort and protection of good plumbing and the proper sewage disposal.

Mohawk Septic Tanks are made of copper-bearing, rust-resisting iron, all seams extra heavy welded, coated inside and outside with a heavy coating of natural asphalt compound, insuring long life. Gauges 12 and 14, unbreakable. Each unit complete in itself. No assembling of parts.

AN ADDED MARGIN
OF STRENGTH...

"TRUS-GEE FITTING"

BRAWNY JOURNEYMEN dragging and twisting on pipe lines to make both ends meet. Powerful hands armed with Stillsons drawing tight joints tighter. Failing supports and settling buildings piling up the load on pipe lines. Fittings must carry these emergency loads and strains. Failures are expensive.

Play doubly safe with Square "Gee" Trus-Fittings. Reinforced to give an added margin of strength, these new, exclusive fittings take the brunt of extra loads with ease.

You pay no more for this added factor of safety. Now, more than ever before, "your fitting problem is solved when you say Square 'Gees'".
